22nd June, 2026

ACKNOWLEDGEMENT

I would like to express my sincere gratitude to everyone who contributed to the successful completion of this Summer Internship Project.

First and foremost, I extend my heartfelt thanks to the founders of House of Omnific Pvt. Ltd., Ms. Saryu Mehla and Mr. Hemant Dahiya, for providing me with the opportunity to be a part of their organization. Their constant guidance, trust, and willingness to share their industry knowledge made this internship an immensely enriching learning experience.

I extend my gratitude to all the team members at House of Omnific who supported me throughout the internship and contributed to making this experience both memorable and rewarding. A special note of thanks to Ms. Shristi Mishra, my corporate mentor. Her continuous guidance, constructive feedback, patience, and encouragement helped me navigate projects effectively. Her mentorship played a significant role in shaping my learning journey.

I am deeply grateful to Prof. Parveen Ahluwalia for his invaluable guidance and unwavering support throughout the Summer Internship journey. Besides an academic mentor, he has been a constant source of motivation, direction, and encouragement. This work would not have been possible without his guidance.

Finally, I am truly thankful to Great Lakes Institute of Management, Gurgaon for enabling this enriching experience, which has had a lasting impact on my personal and professional development.

CERTIFICATE OF ORIGINALITY

This is to certify that the internship project report submitted by me is a result of my own original work carried out on the project titled – “Traditional Events to Experiential Events: How Human Emotions Are More Impacted Holistically Than Just to Sell Products / Product-Service”.

This report has been prepared under the guidance of Prof. Parveen Ahluwalia and Ms. Shristi Mishra and is submitted as part of my summer internship. All sources of information have been appropriately acknowledged.

I further declare that this report has not been submitted to any other organization or institution, nor has it been published in any form previously.

Sreejita Bhowmik

P2514063

PGDM 2025–2027

Great Lakes Institute of Management, Gurgaon

CERTIFICATE OF COMPLETION

It is certified that Ms. Sreejita Bhowmik, a PG student of Great Lakes Institute of Management, Gurgaon has undergone a Summer Internship at House of Omnific Private Limited from 01/04/2026 to 31/05/2026.

Her project titled "Traditional Events to Experiential Events: How Human Emotions Are More Impacted Holistically Than Just to Sell Products / Product-Service." has been completed to our satisfaction and the present report is a bona fide account of the same.

EXECUTIVE SUMMARY

This report presents the findings of a Summer Internship Project conducted at House of Omnific Pvt. Ltd., a Gurugram-based boutique creative and experiential marketing agency. The study explores the evolution of the event industry from traditional, execution-centric formats to experiential events that prioritize emotional engagement, meaningful participation, and long-term brand relationship building. The research investigates how experiential marketing influences consumer perceptions and emotions beyond conventional product promotion and evaluates its effectiveness as a contemporary brand communication strategy.

The Indian events and experiential marketing industry is witnessing significant growth, driven by changing consumer preferences, increasing brand investments in engagement-led marketing, and the integration of digital and physical experiences. As audiences increasingly seek meaningful and memorable interactions with brands, experiential events have emerged as a powerful medium for creating emotional connections, enhancing brand recall, and fostering customer loyalty.

The study examines experiential marketing practices across diverse industries through secondary research and brand case analyses, including Jaquar Group, McDowell's/United Spirits, JK Tyre, Red Beryl, and Smirnoff. These brands operate in different market environments and product categories; however, they demonstrate a common strategic shift from product-focused promotion to experience-led engagement. The analysis highlights how storytelling, immersive environments, cultural relevance, personalization, and interactive participation have become central to successful event strategies. While some brands leverage experiential platforms to overcome advertising restrictions, others use them to strengthen stakeholder relationships, create aspirational brand associations, and build communities around shared experiences.

To validate these insights, primary research was conducted through a structured survey of industry professionals representing brand teams, agency practitioners, and business stakeholders. The findings reveal a strong consensus that experiential events outperform traditional formats in generating emotional engagement, enhancing brand recall, encouraging advocacy, and creating lasting impressions. Respondents consistently identified storytelling, audience participation, personalization, and integrated communication as the key drivers of event effectiveness. The study further indicates that the success of modern events is increasingly determined by the quality of experiences they create rather than the scale of execution alone.

The research successfully addresses its key objectives by demonstrating that traditional event formats have limitations in sustaining audience engagement, while experiential events create deeper emotional connections and stronger brand associations. The findings also establish that the integration of offline experiences with digital and social media touchpoints significantly amplifies event impact and extends audience engagement beyond the event itself.

The study concludes that experiential marketing is no longer a supplementary promotional tool but a strategic business approach that enables brands to build authentic relationships with consumers. For House of Omnific Pvt. Ltd., this industry transformation presents substantial opportunities to leverage its creative-first philosophy, personalized client approach, and expertise in experience design to deliver emotionally resonant and strategically impactful brand experiences. As the industry continues to evolve, agencies that successfully combine creativity, storytelling, technology, and human insight will be best positioned to drive meaningful engagement and long-term brand value.

MAJOR RECOMMENDATIONS

The following recommendations are proposed for House of Omnific Pvt. Ltd. to strengthen its competitive positioning, expand its market presence, and capitalise on the structural shift toward experiential marketing in India.

1. Partner with Young, Disruptive Brands to Unlock Creative Potential

While House of Omnific has built a strong portfolio across established brands such as Jaquar, Kajaria, JK Tyre, and McDowell's, partnering with younger, challenger brands can provide greater creative freedom and innovation opportunities. Emerging D2C, lifestyle, fashion, beauty, and technology brands are often more open to unconventional ideas, immersive activations, and digital-first experiences. A balanced client portfolio comprising both established corporates and agile new-age brands would allow HoO to showcase its creativity while building a stronger experiential portfolio.

2. Strengthen Social Media and Digital Amplification of Experiences

The study highlights that the impact of an event no longer ends when attendees leave the venue. Social media content, aftermovies, influencer collaborations, reels, and user-generated content often generate significantly greater reach than the event itself. House of Omnific should develop a stronger content-first approach by planning digital amplification from the ideation stage itself.

3. Reposition House of Omnific Beyond Events

House of Omnific should strengthen its positioning as a Brand Experience & Entertainment Company rather than being perceived primarily as an event agency. Given its capabilities across ATL, BTL, content, experiences, artist-led engagements, and cultural activations, this positioning would more accurately reflect its integrated approach to building meaningful brand-audience connections and differentiate it from traditional event management firms.

CHAPTER 1: INTRODUCTION & BACKGROUND

1.1 Background and Context

The event industry has undergone a significant transformation over time. Traditionally, events such as conferences, dealer meets, and product launches were designed primarily for communication and logistical execution. Their success was measured through attendance, scale, and seamless delivery.

However, with the rise of the experience economy and evolving audience expectations, the role of events has expanded. Today, brands are no longer focused on just delivering information but on creating immersive experiences that influence perception and build lasting relationships.

This shift marks the transition from traditional events to experiential events, where the focus moves from execution to emotion, from transaction to relationship. Events are now designed as holistic journeys, integrating storytelling, environment design, personalization, and digital amplification to create meaningful engagement.

1.2 Company Overview: House of Omnific Pvt. Ltd.

Operating within this evolving landscape is House of Omnific Pvt. Ltd., a Gurugram-based boutique agency founded by Mr. Hemant Dahiya and Ms. Saryu Mehla incorporated on October 2021, that positions itself as both a creative and strategic partner in the experiential event industry.

Built on the philosophy of “creating all things creative,” the agency focuses on designing meaningful and immersive brand experiences rather than just executing events.

The identity of the brand, symbolized by the owl which represents wisdom, foresight, and mindful creativity, reflecting a balance between innovation and strategy. It signifies their ethos. The emerald green logo is a reflection of growth and awareness that propels towards action, sparking innovation with every turn. The organization focuses on “finesse, lean & mean team, and classy output.”

It follows a boutique model, emphasizing: Limited and curated clients, Vertical-based servicing and a strict no competing clients policy. Importantly, the agency does not see

itself as just a creative agency, but as a strategic agency, where every experience is aligned with long-term brand objectives.

1.3 Service Portfolio

House of Omnific operates across both Above-the-Line (ATL) and Below-the-Line (BTL) domains, enabling seamless integration of communication and experience.

Table 1.1: Service Portfolio of House of Omnific Pvt. Ltd.

Category	Services Offered
ATL	Brand Films, TVCs, Digital Campaigns, Creative Communication
BTL & Experiential Marketing	Annual Business Conferences, Dealer Meets, Loyalty Programmes, Exhibitions, Activations, Awards & Recognition
Experience-Led Specialisations	Brand & Product Launches, Marquee Events, Fashion Events, UHNI Curated Experiences, Intellectual Property (IP), Influencer Collaborations
Content & Amplification	Shoot & Edit, Social Media Content, Influencer Campaigns, Post-Event Amplification
Execution & Operations	Vendor Sourcing, Logistics Management, On-ground Execution, Project Management

1.4 Work Portfolio and Clientele

1.4.1 Key Clients

Jaquar Group, ITC Limited, Kohler, Kajaria, Hero MotoCorp, Pernod Ricard, Hero, Genpact, LinkedIn, Greenlam Laminates, Merino, Khaitan & Co., Red Beryl, Elena, among others.

1.4.2 Nature of Work Delivered

The agency has executed:

- Large-scale corporate conferences (India & international)
- Dealer meets and loyalty programs
- Luxury curated experiential events
- Wellness and lifestyle activations
- Industry conferences such as HICSA
- Private cultural and high-end experiences

1.5 Organizational Structure

House of Omnific operates with a lean and mean team of approximately 8 members, enabling efficiency and flexibility.

- Founders: Mr. Hemant Dahiya and Ms. Saryu Mehla
- Client Servicing & Content: Ms. Shrishti Mishra
- Operations & Logistics: Mr. Sachin Sharma
- 3D Design: Mr. Viney Bondwal and Mr. Jaswant Singh
- Finance: Mr. Sonu
- Support Staff: Mr. Rishi

1.6 Need for Project Brief

As part of the Summer Internship Program, the company onboarded interns under the context of: “Research & Development, creative value addition, and bringing a Gen Z perspective to the industry.” The tasks assigned under this context include contributing to multiple stages of event development, including ideation, research, content creation, and experience design.

The project undertaken during this internship is: From Traditional Events to Experiential Events: Understanding How Human Emotions Are Impacted Holistically Beyond Product & Service Promotion. The study aims to analyze how the event industry is transitioning from execution-led formats to experience-driven engagements, focusing on emotional impact, audience engagement, and long-term brand relationships.

¹ House of Omnific. (2025). Company Overview. houseofomnific.com.

CHAPTER 2: PROJECT OBJECTIVES

2.1 Core Objective

To analyze the transformation of the event industry from traditional, execution-led formats to experiential, emotion-driven engagements, and understand their impact on audience engagement, brand perception, and long-term relationship building.

2.2 Sub-Objectives

- To understand the limitations of traditional event formats in driving engagement.
- To identify key elements of experiential events such as storytelling, environment design, and personalization.
- To analyze the role of ATL, BTL, and digital integration in experiential marketing.
- To evaluate how experiential events influence emotional connection and brand recall.
- To study real-world applications through case studies of brands like Jaquar, Kajaria, McDowell's, JK Tyre, Red Beryl, Pass Pass, Aviva, and Smirnoff.

CHAPTER 3: RESEARCH DESIGN

3.1 Methodology

The study adopts a combination of both Primary Research and Secondary Research approaches to understand the transition from traditional events to experiential events and their impact on audience engagement, brand perception, and emotional connection. This dual-methodology approach ensures both breadth of industry understanding (through secondary sources) and depth of practical insight (through primary fieldwork and survey data).

3.1.1 Secondary Research Approach

The secondary research focuses on understanding industry overview and market trends, growth of the experiential and event industry, brand positioning and marketing strategies, market share and competitive landscape, product portfolios and customer segments, and the role of experiential marketing across industries.

For this purpose, brands such as Jaquar Group, Kajaria Ceramics, McDowell's, JK Tyre, Red Beryl, Aviva, Pass Pass, and Smirnoff Minty Jamun have been studied as case references. The research has been conducted through industry reports, company websites and annual reports, market research platforms (Mordor Intelligence, IMARC Group, Ken Research, TechSci Research), and published articles from verified databases.³

3.1.2 Primary Research Approach

The primary research comprises two complementary streams:

Stream 1: Practical Exposure and Observation – Direct participation and observation during the internship at House of Omnific Pvt. Ltd., encompassing event conceptualisation and ideation, pitch deck development, vendor sourcing and coordination, experience design and spatial planning, content creation and digital amplification, artist and venue research, CRM and relationship-building concepts, exhibition and activation planning, and lead generation and client engagement activities.

Stream 2: Structured Industry Survey – A structured questionnaire administered to 12 industry professionals across brand-side decision-makers, agency practitioners, and trade-side stakeholders. The questionnaire employed a combination of ratings, categorical responses, and open-ended qualitative prompts to capture both quantitative patterns and qualitative depth.⁴

3.2 Target Segment

The primary survey targeted three distinct respondent segments to ensure triangulated validation:

- Brand-Side Decision Makers
- Agency-Side Practitioners

3.3 Geographical Coverage

The study primarily focuses on the Indian market, with practical exposure concentrated in Delhi NCR, Jaipur, and Mumbai. These locations were selected based on the projects and events handled during the internship period. The primary survey respondents are predominantly based in Delhi-NCR and Mumbai, reflecting the concentration of India's event and marketing ecosystem in these two metropolitan regions.

3.4 Research Instrument

The primary research employed a structured questionnaire with semi-structured elements, designed to capture both quantitative ratings and qualitative perspectives.

3.5 Sample Size

Table 3.2: Sample Size Summary

Component	Sample	Details
Secondary Research	8 brands	Jaquar, Kajaria, McDowell's, JK Tyre, Red Beryl, Pass Pass, Aviva, Smirnoff

Primary – Observation	7 projects	Direct internship involvement at House of Omnific
Primary – Survey	12 respondents	12 unique organizations across 2 segments

As the study is exploratory and qualitative in nature, the focus is on gaining deep practical insights and triangulated validation rather than conducting large-scale quantitative analysis. The purposive sampling strategy ensures representation across brand-side, agency-side, and trade-side perspectives.

3.6 Respondent Profile

S. No.	Organization	Respondent Type	Designation	Industry
1	Diageo India	Client Brand	Senior Brand Manager	Alcoholic Beverages / FMCG
2	Jaquar Group	Client Brand	Brand Manager	Bathware & Building Solutions
3	JK Tyre	Client Brand	Brand Communications Manager	Automotive & Tyres
4	Showtime Events	Competitor Agency	Associate Account Director	Experiential Marketing & Events
5	Tribes Communication	Competitor Agency	Experiential Marketing Lead	Integrated Marketing &

				Experiential Marketing
6	Kettle Communications	Competitor Agency	Brand Activation Manager	Brand Activation & Experiential Marketing
7	Prime Integrated Marketing Solutions	Competitor Agency	Account Director	Integrated Marketing & Experiential Marketing
8	SPADE	Competitor Agency	Group Account Manager	Experiential Marketing & Brand Activations
9	Foxtale	Experiential Brand	Assistant Manager – Retention Marketing	Beauty & Personal Care (D2C)
10	Swiss Beauty	Experiential Brand	Brand Manager	Cosmetics & Beauty
11	Gully Labs	Experiential Brand	Marketing & Community Lead	Sneaker
12	boAt Lifestyle	Experiential Brand	Assistant Brand Manager	Consumer Electronics

3.7 Limitations of the Primary Survey

- **Sample Size Constraint** – The primary survey sample of 15 respondents, while purposively selected for depth and relevance, is not statistically representative of the broader event industry population. Findings should be interpreted as indicative rather than generalizable.
- **Industry Concentration** – Respondents are predominantly from the marketing, events, and brand management functions. Perspectives from other stakeholders (e.g., consumers, finance teams, procurement) are not captured.
- **Geographic Limitation** – Practical exposure is concentrated in Delhi-NCR, Jaipur, and Mumbai. Insights may not fully represent experiential marketing practices in South India, East India, or Tier 3 cities.
- **Self-Selection Bias** – Respondents who agreed to participate may inherently have a more favourable disposition toward experiential marketing, potentially introducing positive response bias.
- **Temporal Scope** – The study captures a snapshot of the industry during the internship period (April-May, 2026). The rapidly evolving nature of the events industry means that some insights may require periodic updating.

³ Sources include Mordor Intelligence (2025), IMARC Group (2025), Ken Research (2024), TechSci Research (2024), EY India (2025).

CHAPTER 4: MARKET OVERVIEW

4.1 Event Industry Overview

The Indian events industry has emerged as one of the most dynamic and rapidly expanding segments within the broader Media & Entertainment (M&E) ecosystem. India’s M&E industry was valued at ₹2.78 trillion (approximately USD 33 billion) in 2024–25, with the organized live events segment crossing ₹12,000 crore (approximately USD 1.5 billion), registering a remarkable 44% year-on-year growth. The broader Indian events and exhibitions market is estimated at USD 4.75–5.66 billion, projected to grow at a CAGR of 8.31% through 2030. This growth is driven by increasing corporate spend on experiential marketing, the expansion of events into Tier 2 and Tier 3 cities, the integration of digital technologies with physical experiences, and a fundamental shift in consumer preference from passive consumption to active, experience-driven engagement.¹

The industry encompasses a diverse range of segments including corporate conferences, trade exhibitions, weddings and social events, live entertainment, brand activations, government and institutional events, and the rapidly growing experiential marketing vertical. India’s wedding industry alone is valued at approximately ₹3.75 lakh crore (USD 50 billion), while the MICE (Meetings, Incentives, Conferences, and Exhibitions) segment is estimated at USD 4–5 billion with a projected CAGR of 13–18%. The live entertainment segment, valued at approximately USD 8 billion in 2024, represents the fastest-growing vertical within the ecosystem.²

4.1.1 Market Size & Growth

The following table consolidates the key market size indicators and growth trajectories across the major segments of the Indian events industry, providing a data-driven foundation for understanding the scale of opportunity that defines the competitive environment for event agencies including House of Omnific.

Table 4.1: Event Industry Market Size & Growth (India, 2024–25)

Segment	Market Size (2024–25)	Growth / CAGR	Source
India M&E Industry (Total)	₹2.78 Trillion	Steady growth	EY India, 2025
Organized Live Events	~₹12,000+ Crore (~USD 1.5B)	44% YoY; ~19% CAGR	EY India, 2025
Events & Exhibitions Market	USD 4.75–5.66 Billion	8.31% CAGR to 2030	IMARC Group, 2025
Wedding Industry	~₹3.75 Lakh Crore (~USD 50B)	Steadily expanding	Industry Estimates, 2025
Live Entertainment	~USD 8 Billion (2024)	Fastest-growing segment	Deep Market Insights, 2025
MICE (Events-specific)	USD 4–5 Billion	13–18% CAGR	Mordor Intelligence, 2025

4.1.2 Industry Segments

The Indian event industry can be broadly classified into five key segments, each characterized by distinct client profiles, revenue models, competitive dynamics, and experiential marketing requirements:

1. Corporate & MICE (Meetings, Incentives, Conferences, Exhibitions)

This segment serves corporate clients seeking to engage employees, channel partners, industry stakeholders, and potential customers through professional gatherings. The MICE industry in India is valued at USD 4–5 billion with a CAGR of 13–18%. Events range from small-format board retreats to large-scale annual conferences with 5,000+ attendees. Key growth drivers include India’s emergence as a preferred MICE destination, government initiatives such as the Meetings India initiative, and increasing corporate recognition that experiential engagement outperforms traditional communication in driving stakeholder alignment.

2. Weddings & Social Events

India's wedding industry, valued at approximately ₹3.75 lakh crore (USD 50 billion), is one of the largest in the world. The organized wedding planning segment is growing rapidly as families across Tier 1–3 cities increasingly seek professional event management. The industry spans venue management, décor, entertainment, hospitality, and logistics. A significant trend is the rise of “destination weddings” and “experiential weddings” where the wedding itself becomes an immersive, multi-day experience rather than a single-day ceremony.

3. Live Entertainment

The live entertainment segment, encompassing music concerts, comedy shows, theatrical performances, and sports events, is valued at approximately USD 8 billion in 2024, making it the fastest-growing segment within the industry. The proliferation of digital ticketing platforms (BookMyShow, Paytm Insider), artist management companies, and sponsored entertainment IPs has democratized access and created scalable revenue models. International artist tours and homegrown music festivals (Sunburn, NH7 Weekender, Lollapalooza India) have positioned India as a global live entertainment destination.

4. Experiential Marketing & Brand Activations

This is the most strategically relevant segment for agencies like House of Omnific. Experiential marketing—where brands create immersive, interactive experiences designed to generate emotional connection rather than passive awareness—is growing at an estimated 15–19% CAGR in India. Global experiential marketing spend reached approximately USD 128.35 billion in 2024, with India emerging as one of the fastest-growing markets. Key formats include pop-up experiences, brand installations, interactive product demonstrations, influencer-led activations, and hybrid digital-physical events.

5. Government & Institutional Events

Government events represent a significant volume segment, encompassing state functions, cultural festivals, policy summits, election-related events, and public

awareness campaigns. While often driven by scale and logistics rather than creative excellence, the segment is increasingly adopting experiential elements—particularly for citizen engagement, tourism promotion (Incredible India events), and smart city showcases. The segment offers steady revenue but typically lower creative margins compared to corporate and brand activation work.

4.1.3 Top Players in the Indian Event Industry

The Indian event industry is characterized by a tiered competitive structure. Understanding where House of Omnific sits within this landscape is essential for strategic positioning.

Tier 1: Legacy Giants & Market Leaders

These are large, established companies with 20–40+ years of experience, pan-India (and often international) operations, and portfolios spanning corporate events, entertainment IPs, brand activations, and government events. They command premium pricing and have deep relationships with Fortune 500 and top Indian conglomerate clients.

Table 4.2: Tier 1 – Legacy Giants & Market Leaders

Company	Founded	Key Strength	Notable Work
Wizcraft International	1988	Pioneer of Indian event industry	IIFA Awards, large-format brand events
Percept Limited	1984	Media, entertainment, live events	Sunburn Festival, corporate experiential
DNA Entertainment	2002	Large-scale live events & sports	IPL-associated events, concerts
Fountainhead MKTG	1995	Experiential marketing & integration	Brand activations, integrated campaigns

Tier 2: Established Specialists

These companies have carved strong niches in specific verticals—luxury weddings, technology-driven activations, trade exhibitions, or creative corporate events. They have 10–20+ years of experience and operate primarily in metro markets with selective expansion.

Table 4.3: Tier 2 – Established Specialists

Company	Specialization	Positioning
70 EMG	Luxury events, celebrity management	High-end weddings, premium brand experiences
E-Factor Entertainment	Bespoke luxury events	High-profile weddings, social events
Showtime Events	Technology-driven activations	Brand launches, conferences
TAFCON Group	Trade fairs & exhibitions	B2B industrial summits
TOAST Events	Creative corporate events	Lifestyle brands, corporate engagement

4.1.4 House of Omnific: Industry Positioning

House of Omnific Pvt. Ltd., established in 2021 and headquartered in Gurgaon (Delhi-NCR), operates as a boutique creative agency within the Indian event industry. While the company is young and lean compared to established players, its positioning offers several strategic advantages in an industry that is increasingly rewarding creativity, personalization, and design-led thinking over scale and logistics capability alone.

Table 4.4: House of Omnific – Competitive Positioning

Dimension	House of Omnific's Position
Industry	Boutique Creative Agency
Age	~4 years (est. 2021) – Young, agile
Location	Gurgaon, Delhi-NCR
Competitive Moat	Creative-first, founder-led, bespoke work

The key strategic insight is that the experiential marketing segment, which is the core competency of House of Omnific, is the fastest-growing vertical within the events industry. While Tier 1 and Tier 2 companies compete on scale, legacy, and operational breadth, boutique agencies like House of Omnific compete on creative intensity, founder-led client relationships, and the ability to deliver bespoke, design-forward experiences that larger organizations often cannot replicate.

4.2 Brand-wise Industry & Company Analysis

This section presents a comprehensive analysis of eight brands across seven industries that were studied during the internship at House of Omnific. For each brand, the analysis covers the broader industry context (market size, growth trajectory, competitive dynamics), the specific company's profile and competitive positioning, and a strategic insight linking the brand's marketing approach to the broader theme of experiential transformation.

4.2.1 Bath Fittings & Sanitaryware Industry (Jaquar Group)

Industry Overview

The Indian bath fittings and sanitaryware industry is valued at approximately USD 11.49 billion (2025), projected to grow at a CAGR of 7.74% through 2030. The market is characterized by a significant organized-unorganized split, with the organized segment accounting for only 35–40% of the total market. Key growth drivers include rapid urbanization, the government's Smart Cities Mission, rising consumer preference for premium and designer bathroom solutions, and increasing replacement demand in existing residential and commercial properties. The shift from functional to aspirational bathrooms has fundamentally altered the competitive landscape, making design, aesthetics, and experiential showroom environments critical differentiators.³

Company Analysis: Jaquar Group

Jaquar Group is the undisputed market leader in India’s organized bath fittings segment, commanding approximately 60% market share in the organized category. Founded in 1960, the company has evolved from a brass fittings manufacturer to a comprehensive bath and lighting solutions provider with a portfolio spanning faucets, showers, sanitaryware, wellness products (Jacuzzi, steam, sauna), kitchen sinks, and lighting. In FY 2024–25, Jaquar Group reported revenue of approximately ₹7,493 crore, with operations spanning 40+ countries, 1,800+ dealer touchpoints across India, and 75+ experience centres (branded showrooms). The company’s product portfolio encompasses three positioning tiers: Jaquar (premium), Artize (luxury/designer), and Essco (value segment), enabling coverage across all price points of the organized market.³

Competitive Landscape

Table 4.5: Bath Fittings – Competitor Analysis (Jaquar Group)

Competitor	Market Position	Key Strength	Revenue (Approx.)
Hindware (HSIL)	2nd in organized	Strong distribution, brand legacy	~₹3,500 Cr
Cera Sanitaryware	3rd in organized	Value-for-money, South India	~₹2,000 Cr
Kohler (Global)	Premium international	Global brand equity, design	N/A (India-specific)
Grohe (Global)	Premium international	German engineering, technology	N/A (India-specific)
Roca (Global)	Premium international	European design heritage	N/A (India-specific)

Bath Fittings Market Share — Organized Segment (India)

Figure 4.1: Bath Fittings Market Share — Organized Segment (India)

4.2.2 Tiles & Home Surfaces Industry (Kajaria Ceramics)

Industry Overview

The Indian tiles and home surfaces industry is valued at approximately USD 5.86 billion (2024), projected to grow at a CAGR of 9.1–9.5% through 2030. India is the world's second-largest producer and consumer of ceramic tiles, with an installed capacity exceeding 1,500 million square metres annually. The industry is concentrated in Gujarat (Morbi cluster accounts for ~70% of national production) with emerging clusters in Rajasthan, Andhra Pradesh, and Tamil Nadu. The organized segment accounts for 30–50% of the market, with the balance served by unbranded and regional players. Key growth drivers include the real estate boom, urbanization, government housing schemes (PMAY), and the shift from cement/marble flooring to ceramic and vitrified tiles.⁴

Company Analysis: Kajaria Ceramics

Kajaria Ceramics Limited is India’s largest ceramic tile manufacturer by revenue, with a portfolio of 3,000–4,000+ designs spanning ceramic wall tiles, vitrified tiles, polished glazed tiles, designer tiles, bathroom tiles, and outdoor tiles. In FY 2024–25, Kajaria reported revenue of approximately ₹4,680 crore, with a production capacity of ~125 million square metres across 8 manufacturing plants. The company operates through 1,800+ dealer touchpoints, 600+ exclusive Kajaria Prima Plus showrooms, and a network of branded display centres that function as design studios where consumers and architects can visualize tile applications in simulated room settings.⁴

Competitive Landscape

Table 4.6: Tiles – Competitor Analysis (Kajaria Ceramics)

Competitor	Market Position	Key Strength	Revenue (Approx.)
Somany Ceramics	2nd largest organized	Wide range, brand trust	~₹2,200 Cr
Asian Granito	3rd largest	Marble/quartz surfaces	~₹1,800 Cr
Orient Bell	Premium/specialized	Design-led, architect focus	~₹1,500 Cr
RAK Ceramics	International premium	Middle East heritage, luxury	N/A (India-specific)
Johnson Tiles (Prism)	Mass-market organized	Affordable, wide distribution	~₹1,200 Cr

4.2.3 Alcoholic Beverages Industry (McDowell’s / United Spirits)

Industry Overview

The Indian alcoholic beverages industry is valued at approximately USD 39–66 billion (2024), projected to grow at a CAGR of 5–7% through 2030. India is the world’s third-largest market for alcoholic beverages by volume and one of the fastest-growing

markets globally. The IMFL (Indian-Made Foreign Liquor) segment, which includes premium brands like McDowell's, accounts for approximately 70% of the organized market. The industry operates under one of the most restrictive regulatory environments globally: direct advertising of alcoholic products is prohibited across all media, including print, television, digital, and outdoor. This regulatory constraint has made experiential marketing, surrogate branding, and trade engagement the primary brand-building vehicles.⁵

Company Analysis: McDowell's (Diageo India)

McDowell's No.1 is India's largest spirits brand and one of the world's top-selling whisky brands by volume. United Spirits Limited (USL), the parent company (now a subsidiary of global spirits giant Diageo plc), reported Net Sales Value (NSV) of approximately ₹12,069 crore and EBITDA of approximately ₹2,243 crore in FY 2024–25. The company holds approximately 20–25% of the total IMFL market in India, with a portfolio spanning McDowell's No.1 (mass-premium whisky), Black Dog (premium Scotch), Royal Challenge (mid-premium), Signature (premium), and Smirnoff (vodka). The company's go-to-market strategy relies heavily on trade engagement (dealer meets, distributor conferences), experiential platforms (Yaariverse metaverse, music and lifestyle IPs), and surrogate branding through the McDowell's Soda and music ventures.⁵

Company Analysis: Smirnoff (Diageo India / USL)

The Indian vodka market is valued at approximately USD 3.18–4.73 billion (2024), projected to grow at a CAGR of 4.85–6.52% through 2030. Vodka accounts for approximately 8–10% of the total IMFL market in India, with the flavoured vodka sub-segment growing significantly faster than unflavoured variants, driven by Gen-Z and millennial consumption patterns, premiumization trends, and the cocktail culture revolution in urban India. Smirnoff Minty Jamun, launched in August 2025, represents Diageo India's strategic push into the India-specific flavoured vodka segment. Positioned under the "Flavour is a Vibe" campaign umbrella, the product combines mint and jamun (Indian blackberry)—a distinctly Indian flavour profile—with Smirnoff's global brand

equity. Key product attributes include 37.5% ABV, a “glocal” flavour innovation strategy (global brand, local taste), and an India-first market launch designed to capture the growing demand for culturally relevant, experiential drinking occasions among the 21–35 age demographic. The launch was activated through a multi-city experiential campaign including bar takeovers, influencer-led tasting events, digital amplification through social media, and cultural partnerships (notably the Kala Ghoda Arts Festival in Mumbai).¹⁰

Competitive Landscape

Table 4.7: Alcoholic Beverages – Competitor Analysis

Competitor	Market Position	Key Strength	Revenue (Approx.)
Pernod Ricard India	2nd largest IMFL	Premium portfolio (Royal Stag, Blenders Pride, Jameson)	~₹10,000 Cr
Allied Blenders (ABD)	3rd largest by volume	Officer’s Choice (world’s largest whisky)	~₹8,000 Cr
Radico Khaitan	Fast-growing premium	8PM, Magic Moments, premiumization strategy	~₹3,500 Cr
Tilaknagar Industries	Regional/brandy focus	Mansion House brandy, South India	~₹1,500 Cr
Beam Suntory	International premium	Jim Beam, Maker’s Mark, niche premium	N/A (India-specific)

Figure 4.2: Indian Vodka Market Share Distribution (2024)

4.2.4 Automotive Tyres Industry (JK Tyre)

Industry Overview

The Indian automotive tyre industry is valued at approximately USD 12–16 billion (2024), projected to grow at a CAGR of 4–12% through 2030 depending on the segment (passenger vehicle tyres growing faster than commercial vehicle tyres). India is the world's fourth-largest tyre manufacturer, with an annual production capacity exceeding 200 million tyres. The industry is characterized by high capital intensity, technology-driven differentiation, and a concentrated competitive structure where the top 5 players account for approximately 85% of the organized market. Key growth drivers include India's expanding automotive market, infrastructure development (expressways,

highways), the EV transition (requiring specialized tyres), and the premiumization trend in passenger vehicles.⁶

Company Analysis: JK Tyre & Industries

JK Tyre & Industries Limited is one of India’s leading tyre manufacturers, with revenue of approximately ₹14,693 crore in FY 2024–25 and an estimated 12–15% share of the domestic tyre market. The company’s portfolio spans radial and bias tyres for passenger cars, commercial vehicles, two-wheelers, OTR (off-the-road), and specialty applications. JK Tyre operates through 8 manufacturing plants (6 in India, 2 in Mexico) with a combined capacity of ~35 million tyres annually. The company is uniquely positioned through its 28+ year association with motorsport—the JK Tyre National Racing Championship (JKNRC), established in 1997, is India’s premier motorsport event and has been the launchpad for virtually every Indian racing talent.⁶

Competitive Landscape

Table 4.8: Automotive Tyres – Competitor Analysis (JK Tyre)

Competitor	Market Position	Key Strength	Revenue (Approx.)
MRF Limited	Market leader (~29%)	Brand trust, premium positioning	~₹25,000 Cr
Apollo Tyres	2nd largest (~27%)	International presence, Vredestein	~₹26,000 Cr
CEAT Limited	4th largest (~14%)	Innovation, sport sponsorships	~₹12,500 Cr
Bridgestone (Global)	International premium	Japanese engineering, OEM	N/A (India-specific)
Continental (Global)	International premium	German technology, premium OEM	N/A (India-specific)

with MRF leading followed by Apollo and JK Tyre.

Figure 4.3: Automotive Tyre Market Share by Revenue (India)

4.2.5 Luxury Experiential Services Industry (Red Beryl)

Industry Overview

The global experiential marketing industry was valued at approximately USD 128.35 billion in 2024, while India's organized events market crossed ₹12,000 crore. Within this ecosystem, the luxury experiential services segment—catering to Ultra-High-Net-Worth Individuals (UHNIs) and High-Net-Worth Individuals (HNIs)—represents a niche but rapidly growing vertical. India has approximately 13,000+ UHNIs (net worth exceeding USD 30 million) and 350,000+ HNIs (net worth exceeding USD 1 million), with this population growing at approximately 30% over the past five years. The luxury experiences market in India encompasses curated travel, bespoke celebrations, exclusive access events, wellness retreats, and personalized lifestyle management.⁷

Company Analysis: Red Beryl Lifestyle Services

Red Beryl operates as an invitation-only, ultra-premium lifestyle and experiential services company targeting UHNIs and HNIs. Named after the rare red beryl gemstone (rarer than diamonds), the brand positions itself as the “gem of exclusivity.” Key offerings include DreamWeaver—a bespoke experience design service that creates personalized, once-in-a-lifetime experiences (e.g., private island celebrations, curated art and culinary journeys, exclusive concert access), membership-based lifestyle concierge services, luxury event conceptualization and production, and curated travel and wellness experiences. Red Beryl does not operate at scale; its competitive advantage lies in extreme personalization, exclusivity, and access to experiences and networks unavailable through conventional channels.⁷

Competitive Landscape

Table 4.9: Luxury Experiential – Competitor Analysis (Red Beryl)

Competitor	Market Position	Key Strength	Pricing Model
Quintessentially	Global luxury concierge leader	International network, 60+ offices	Annual membership (£25K–£100K+)
Ten Group	Global lifestyle concierge	Card-linked, tech-enabled services	Bank/card partnerships
Luxury Escapes	Premium travel deals	Flash-sale model, curated packages	Transaction-based
Independent Planners	Niche luxury event planners	Celebrity connections, social capital	Project-based
Five-star Concierges	Hotel-linked luxury services	On-property guest services	Integrated with hospitality

4.2.6 FMCG – Mouth Freshener & Confectionery (Pass Pass / DS Group)

Industry Overview

The Indian mouth freshener market is valued at approximately USD 396–505 million (2024), with steady growth driven by cultural consumption patterns, widespread

availability, and the deeply embedded social ritual of post-meal freshening. The market is characterized by a highly fragmented competitive structure with the unorganized segment (local pan masala, mukhwas, and regional variants) accounting for approximately 70–75% of total consumption. The organized segment, led by branded players like Rajnigandha, Pass Pass, and regional brands, accounts for approximately 25–30%. Key growth drivers include premiumization (shift from loose mukhwas to branded pouches), health-consciousness-driven innovation (sugar-free, herbal variants), and the extension of mouth freshener brands into adjacent categories (confectionery, candies).⁸

Company Analysis: Pass Pass / DS Group

DS Group is one of India’s largest diversified FMCG conglomerates, with total revenue exceeding ₹10,000 crore across multiple verticals including tobacco (Rajnigandha), mouth freshener (Pass Pass, Rajnigandha Silver), confectionery (Pulse, Chingles), F&B (Catch Spices, Ksheer), and hospitality. The mouth freshener segment contributes approximately 38% of DS Group’s total revenue, making it the single largest revenue driver. DS Group’s confectionery brand Pulse, launched in 2015, achieved a remarkable 19% market share in the hard-boiled candy segment within three years of launch—one of the fastest new-product successes in Indian FMCG history. The company’s distribution network spans 5 million+ retail touchpoints across India, providing unmatched reach in the organized mouth freshener and confectionery segments.⁸

Competitive Landscape

Table 4.10: FMCG – Competitor Analysis (Pass Pass / DS Group)

Competitor	Market Position	Key Strength	Revenue (Approx.)
Rajnigandha (DS Group)	Market leader (premium pan masala)	Brand heritage, premium positioning	Part of DS Group
Gopal Group	Regional leader (Gujarat)	Pan masala, namkeen, regional dominance	~₹3,000 Cr
Perfetti Van Melle	Confectionery leader	Center Fresh, Mentos, global R&D	~₹2,500 Cr

ITC (Mint-O, Candyman)	Diversified FMCG	Distribution, premium range	Part of ITC Group
Parle Products	Mass confectionery	Affordable, widest distribution	~₹15,000 Cr (total)

DS Group Revenue Segmentation (FY 2024-25)

Figure 4.4: DS Group Revenue Segmentation by Business Vertical

4.2.7 Life Insurance Industry (Aviva Life Insurance)

Industry Overview

The Indian life insurance industry is valued at approximately USD 110–120 billion in total premium (2024), projected to grow at a CAGR of 8.7–10.5% through 2030. India's insurance penetration stands at approximately 2.7% of GDP—significantly below the global average of 3.5%—indicating substantial headroom for growth. The industry comprises 24 private sector players and one state-owned giant (Life Insurance Corporation of India / LIC), with LIC holding approximately 60–65% market share. The

private sector is led by SBI Life, HDFC Life, ICICI Prudential, and Max Life Insurance. Key growth drivers include increasing financial literacy, government incentives (Section 80C tax benefits), digital distribution channels, and the growing awareness of protection and retirement planning needs in post-COVID India.⁹

Company Analysis: Aviva Life Insurance

Aviva Life Insurance is a joint venture between Aviva plc (UK-based global insurer, established 1696) and Dabur Group (one of India’s oldest FMCG companies). In FY 2024–25, Aviva Life Insurance reported total premium income of approximately ₹1,307 crore and a net profit of approximately ₹108 crore. The company’s claim settlement ratio stands at an impressive 99.07%, and its solvency ratio of 193% (against the regulatory minimum of 150%) reflects strong financial health. Aviva positions itself as a “quality-over-scale” insurer, focusing on advisory-led distribution, holistic financial planning, and wellness-integrated insurance products rather than volume-driven market share competition.⁹

Competitive Landscape

Table 4.11: Life Insurance – Competitor Analysis (Aviva Life Insurance)

Competitor	Market Position	Key Strength	Market Share (Private)
LIC	Market leader (60–65% total)	Trust, distribution, government backing	~60–65% (total market)
SBI Life	Largest private insurer	SBI bank distribution, scale	~22–25% (private)
HDFC Life	2nd largest private	Product innovation, digital	~15–18% (private)
ICICI Prudential	3rd largest private	ULIP pioneer, Prudential expertise	~12–15% (private)
Max Life	4th largest private	Advisory-led, partnerships	~8–10% (private)

CHAPTER 5: PRODUCT OVERVIEW & UNDERSTANDING

This chapter examines how each of the brands studied in the secondary research actually conducts its events, conferences, dealer meets, product launches, brand activations, and experiential engagements and how they have transitioned from traditional, execution-led event formats to experiential, emotion-driven engagements. The analysis draws on verified industry sources, company communications, and internship observations to document the specific mechanisms of this transition.

5.1 Jaquar Group

Jaquar Group's event strategy revolves around three pillars: immersive experience centres, architect conclaves, and strategically designed dealer meets. The "Jaquar World" and Orientation Centres serve as non-retail, consultative spaces where architects, interior designers, and homeowners interact with complete bathroom and lighting solutions in live, immersive environments. Themed vignettes such as the "Art of Sculpting Water" create aspirational spatial narratives that transform a functional product category into a design experience. These centres offer personalised design consultations, expert guidance, and virtual tours, focusing on enlightenment rather than mere sales.¹

The brand's thought leadership events—"Design Confab" and "Canvas by Jaquar"—bring together leading architects, builders, and designers to discuss industry trends, sustainable design, and architectural innovation. These conclaves feature global luminaries and panel discussions, positioning Jaquar as a patron of creativity. Dealer meets take the form of Annual Business Conferences at premium international locations, combining leadership alignment, product diversification briefings, and excellence awards.

Jaquar's transition from traditional to experiential is exemplified by the evolution from product-catalogue-based dealer presentations to immersive experience centres and emotionally designed conclaves. The brand has shifted its engagement paradigm from "what we sell" to "what you experience," recognising that in a high-involvement,

design-driven category, physical interaction with products in aspirational settings is the most powerful form of marketing.

5.2 Kajaria Ceramics

Kajaria Ceramics conducts events through a multi-format strategy encompassing annual business conclaves, experience centres, architect connect programmes, and trade exhibitions. The Kajaria Annual Business Conclave (e.g., 2026 at Taj Surajkund) serves as the flagship strategic gathering, facilitating leadership discussions, networking, and business strategy alignment with the dealer network. The company's experience centres—Kajaria Eternity World, Kajaria Ambiance, and Kajaria Galaxy—function as localised hubs for dealer and customer engagement, showcasing over 3,000 tile designs in spatially curated environments.²

Kajaria's architect connect strategy leverages advanced 3D launch videos and digital content to demonstrate craft, texture, and dimension of premium collections like Kajaria Gres, enabling architects to visualise applications in real-world contexts. The brand maintains a strong presence at major trade exhibitions such as ACETECH and the Vibrant Ceramics Expo, complemented by high-decibel brand visibility at national events and airports.

The transition Kajaria has undergone is from traditional tile display showrooms—where products were arranged in rows for functional comparison—to experiential spatial visualisation centres where consumers and architects walk through curated room settings. This shift mirrors the broader industry movement from product demonstration to design-inspiration storytelling, where the emotional response to a space takes precedence over technical specifications.

5.3 McDowell's No. 1 (Diageo India)

McDowell's No. 1, operating under the United Spirits umbrella of Diageo India, navigates India's restrictive alcohol advertising regulations through a sophisticated combination of surrogate marketing, digital-experiential platforms, and emotionally engineered trade events. The "Yaari" (friendship) platform anchors the brand's identity,

with surrogate advertising through soda and water lines maintaining top-of-mind awareness using the same branding, tone, and visual cues as the whisky.³

The experiential innovation deployed by McDowell's is particularly noteworthy. The launch of "Yaariverse," a Metaverse-based virtual space designed for virtual concerts and community interactions, represents a pioneering foray into digital-experiential brand building within a regulated category. The "X-Flavour Studio" at India Cocktail Week created immersive sensorial zones where consumers engaged with mixology and product versatility in a hands-on, Instagram-worthy environment. Trade launch events for distributors and retailers are designed to create aspirational emotional experiences that translate into channel enthusiasm and market penetration.

McDowell's transition from traditional to experiential marketing is driven in part by regulatory necessity—but it has transformed necessity into innovation. The brand has evolved from reliance on traditional print and outdoor surrogate advertising to immersive digital-physical experiential platforms that build emotional communities around the brand. The #JoinThePact responsible drinking campaign further demonstrates the use of purpose-driven experiential engagement.

5.4 Smirnoff (Diageo India)

Smirnoff, Diageo's globally iconic vodka brand, adopted a distinctly culture-forward experiential strategy in India with the August 2025 launch of the "Flavour is a Vibe" campaign for three India-first variants: Minty Jamun, Mirchi Mango, and Zesty Lime. Rather than relying on conventional product promotions, the campaign targeted Gen Z and young millennials by embedding the brand within evolving social occasions—casual house parties, rooftop meetups, and "third space" hangouts—positioning vodka consumption as a cultural expression rather than a beverage choice.⁴

Smirnoff's cultural platform strategy is exemplified by the Smirnoff Lemon Pop collaboration with the Kala Ghoda Arts Festival, one of Mumbai's most prestigious cultural events. Rather than functioning as a passive sponsor, the brand created platforms for marginalised communities and creators, aligning with the global "We Do

We” ethos of inclusivity and representation. Branded bar activations focused on cocktail experimentation, Instagram-worthy moments, and community events integrating local music, dance, and art scenes. The “I Choose” packs deployed across hundreds of bars educated consumers on differentiated cocktail experiences.

The transition Smirnoff has undergone in India represents a fundamental shift from promotion-led visibility to culture-led relevance—from sponsorship signage and sampling counters to cultural immersion and community facilitation. This “glocal” strategy (global brand, local connection) demonstrates how experiential marketing can create authentic cultural resonance that transcends traditional product marketing.

5.5 JK Tyre

JK Tyre has carved a uniquely powerful experiential positioning by anchoring its entire brand engagement strategy around motorsport—an association spanning over twenty-eight years and constituting one of the longest-running corporate-sport partnerships in Indian industry. The JK Tyre National Racing Championship (JKNRC) and the Indian Racing Festival, featuring F4 and Wolf racing cars, serve as the brand’s primary experiential platform, creating emotionally charged environments where performance, speed, and engineering excellence are demonstrated rather than merely communicated.⁵

Beyond the national racing circuit, JK Tyre extends its experiential reach through regional roadshows under the “Total Control” festival banner, featuring stunt shows, drifting displays, and interactive driving experiences. Cultural events such as the Hornbill Festival and Orange Festival participation broaden the brand’s experiential touchpoints. The FIA-approved “Girls on Track” programme and all-women racing teams demonstrate the brand’s commitment to inclusive experiential engagement.

JK Tyre’s transition is structurally distinctive: the brand has effectively replaced conventional dealer conferences with motorsport-embedded experiential platforms. Where trade engagement once centred on PowerPoint presentations in hotel ballrooms, it now occurs amidst the roar of engines and the visceral excitement of

competitive racing—creating emotional associations with speed, safety, and engineering that no conference room presentation could replicate.

5.6 Red Beryl

Red Beryl occupies a singular position within this study as a brand for which the experience itself constitutes the core product offering. Operating as a luxury experiential concierge for UHNIs and CXOs through an invitation-only, subscription-based model (the “Red Card”), the company’s “DreamWeaver” service creates bespoke experiences—from VIP access to Wimbledon and Paris Fashion Week to exclusive dining and mobility solutions.⁶

What makes Red Beryl analytically significant is that there is no traditional event format to transition from. The brand was conceived as experiential-native, born into a paradigm where the experience is the revenue model, not a marketing mechanism for an underlying product. Red Beryl represents the logical endpoint of the traditional-to-experiential continuum—validating that in luxury markets, experience supersedes product as the primary driver of loyalty, advocacy, and commercial value.

5.7 Pass Pass (DS Group)

Pass Pass, the flagship mouth-freshener brand of the DS Group, operates within the FMCG category where mass reach and frequency of consumer contact are paramount. The brand’s event strategy reflects this imperative through celebrity-driven campaigns (“Pass Pass Panga” with Shekhar Suman, “Raho Hamesha Pass Pass”) that provide instant cultural awareness, combined with on-ground activations that create direct sensory engagement.⁷

On-ground activations constitute the backbone of Pass Pass’s experiential portfolio: festival sampling programmes, cultural mela participations, and BTL consumer promotions bring the brand into direct physical contact with consumers. The Pulse #PulseOfTheSky kite-flying event (registered in the Limca Book of Records) and AR filters demonstrate the company’s commitment to culturally embedded experiential moments.

The transition Pass Pass has undergone is from pure mass-media advertising to a blended model incorporating mass media, experiential activations, and digital engagement. While the brand continues to invest in television and outdoor advertising for reach, the experiential layer—sampling, cultural tie-ups, AR-enhanced interactions—creates the emotional depth and sensory memory that mass media alone cannot deliver.

5.8 Aviva Life Insurance

Aviva Life Insurance has undertaken a deliberate transformation of its engagement model, moving from product-focused policy presentations to holistic wellness advisory experiences. The “Shape Life with Aviva” campaign drives nationwide agency expansion events in cities like Kolkata, Bhubaneswar, and Kanpur, where agents are repositioned as “Wellness Advisors” trained in financial, physical, and mental well-being—not merely insurance distributors.⁸

Consumer-facing engagement is anchored in emotionally resonant campaigns such as “Hello, Life. Hello, Aviva” and “Making It Click,” which position life insurance as an enabler of meaningful life moments rather than a financial instrument. Digital experiential platforms—AI/ChatGPT integrations for simplified quotes, the Aviva Alexa skill “Insurance Made Simple”—extend the experiential engagement into the digital realm.

Aviva’s transition is philosophically significant because it represents a move from transactional policy-selling events to holistic wellness advisory conclaves—from product features and premium comparisons to emotional narratives about family security, life-stage preparedness, and well-being. In a category where trust is the ultimate purchase driver, this experiential transformation creates the intimate, trust-building interactions that mass advertising alone cannot achieve.

The mechanisms differ—experience centres in bath fittings, metaverse platforms in spirits, motorsport in tyres, wellness conclaves in insurance, cultural partnerships in vodka—but the strategic intent is identical: to create moments of human connection

that transcend the transactional relationship between brand and audience. This convergence across such diverse industries provides powerful empirical validation for the project's core thesis: that the transition from traditional events to experiential events represents a fundamental reconfiguration of how brands create value, build loyalty, and drive commercial outcomes.

CHAPTER 6: PRIMARY RESEARCH

6.1 Key Findings & Analysis

This chapter presents the analysis of primary research conducted with ten industry professionals representing three key stakeholder groups within the experiential marketing ecosystem: client-side decision makers (Diageo India, Jaquar Group, and JK Tyre), competitor agencies (Showtime Events, Tribes Communication, Kettle Communications, and Prime Integrated Marketing Solutions), and brands actively leveraging experiential marketing (Foxtale, Swiss Beauty, and Gully Labs). The findings are further enriched through firsthand observations gathered during the internship at House of Omnific Pvt. Ltd., where the researcher was directly involved in experiential event ideation, client pitches, artist management, dealer engagement initiatives, venue conceptualization, and activation planning across multiple brands.

6.1.1 Awareness & Perception of Experiential Agencies

A significant finding emerging from the primary research was the high level of awareness of House of Omnific among respondents across stakeholder categories. Most respondents were familiar with the agency through industry interactions, referrals, and professional networks. Respondents consistently associated the agency with creativity, innovation, strategic thinking, and customization—attributes that are increasingly becoming critical differentiators in an industry shifting from event execution to experience design.

Interestingly, this perception was consistent across clients, competitor agencies, and experiential brands. Respondents highlighted that boutique agencies such as House of Omnific are increasingly valued not merely for managing events but for their ability to create tailored brand experiences aligned with specific audience segments and business objectives.

This finding was reinforced during the internship through exposure to projects such as Jaquar ABC 2026, the McDowell's No.1 relaunch event, experiential concepts for JK Tyre, and the development of a proprietary experiential IP for Red Beryl. Across these projects, clients consistently sought innovative and strategically aligned experiences rather than conventional event execution, validating the industry's growing preference for agencies capable of delivering both creativity and strategic value.

6.1.2 Experiential vs Traditional Events: Quantitative Assessment

The quantitative findings revealed overwhelming agreement regarding the superiority of experiential events over traditional event formats. Across multiple dimensions—including emotional engagement, audience participation, brand recall, relationship building, and advocacy—respondents consistently assigned higher ratings to experiential marketing initiatives.

The findings directly support the sub-objective of understanding the limitations of traditional event formats in driving engagement. Traditional events were largely perceived as transactional and information-centric, whereas experiential events were viewed as immersive, participatory, and emotionally engaging.

This trend was consistently observed during the internship. Whether working on the McDowell's No.1 relaunch event, dealer engagement initiatives for Jaquar, or conceptualizing product launch experiences for JK Tyre, discussions rarely focused solely on communicating product features. Instead, emphasis was placed on creating memorable experiences capable of generating emotional responses and fostering deeper stakeholder engagement.

Respondents across all categories agreed that experiential events are more effective because they transform audiences from passive observers into active participants, thereby increasing engagement, retention, and long-term brand affinity.

6.1.3 Key Elements of Experiential Events: Storytelling, Environment Design and Personalization

One of the strongest themes emerging from both primary research and practical exposure was the critical role of storytelling, environment design, and personalization in creating memorable experiences. Respondents repeatedly identified these elements as the foundation of successful experiential events.

Storytelling emerged as the most influential factor affecting event effectiveness. Rather than communicating product benefits directly, respondents emphasized the importance of creating narratives that audiences can experience and emotionally connect with. Similarly, environment design was identified as a critical driver of engagement, with immersive spaces significantly enhancing audience participation and recall.

This finding was strongly reflected in internship projects. During the conceptualization of the JK Tyre launch event, significant attention was given to interactive product displays, storytelling-led exhibition design, and immersive visitor journeys. Likewise, while developing experiential concepts for Red Beryl, the focus was not on promoting services directly but on creating emotionally engaging experiences that reflected the aspirations and lifestyles of affluent consumers.

The importance of environment design was also observed during the planning of the McDowell's No.1 relaunch event. Rather than treating the venue as a functional event space, deliberate efforts were made to design experiential touchpoints throughout the attendee journey. Concepts such as immersive tunnel entries, engagement zones, interactive installations, branded photo opportunities, and participation-driven experiences were incorporated to ensure that attendees actively interacted with the brand. These observations reinforce the finding that successful experiential events are built around carefully designed touchpoints that encourage immersion, participation, and emotional engagement.

Personalization emerged as another critical element. Respondents consistently indicated that experiences become memorable when attendees feel personally connected to the event. This finding validates the project objective of identifying key experiential elements such as storytelling, environment design, and personalization.

6.1.4 Role of ATL, BTL and Digital Integration

A major finding from the research was the increasing convergence of ATL, BTL, and digital channels within experiential marketing strategies. Respondents overwhelmingly agreed that experiential events can no longer function as isolated physical experiences. Instead, their effectiveness depends upon seamless integration with digital amplification, social media engagement, influencer collaborations, content creation, and post-event communication.

This finding directly supports the project objective of analyzing the role of ATL, BTL, and digital integration in experiential marketing.

Practical exposure during the internship further reinforced this perspective. While ideating activations for Smirnoff Minty Jamun, discussions extended beyond event execution to include influencer collaborations, social media content opportunities, and cultural relevance. Since Minty Jamun was positioned around nostalgia and youth culture, significant emphasis was placed on identifying collaboration partners that resonated with contemporary audiences. Brands such as Gully Labs and Farak were explored as potential collaborators because of their strong appeal among younger consumers and their ability to enhance authenticity and cultural relevance.

This exercise highlighted an important shift in experiential marketing. Modern activations are increasingly ecosystem-driven, where multiple brands collaborate to create richer and more culturally relevant experiences. Rather than operating in isolation, experiential campaigns are becoming platforms for communities, conversations, and shared brand experiences.

The internship also revealed that experiential activations are increasingly designed with content amplification in mind. Engagement elements such as immersive installations, interactive displays, themed photo opportunities, and participation zones are not only intended to enhance attendee experiences but also to generate shareable content for social media. This demonstrates how physical touchpoints are strategically integrated with digital amplification efforts, enabling brands to extend the impact of experiential campaigns far beyond the event venue.

6.1.5 Experiential Marketing and Emotional Connection

The primary research strongly supports the view that experiential events create deeper emotional connections than traditional marketing formats. Respondents consistently indicated that memorable experiences are those that involve active participation, sensory engagement, and personal relevance.

A recurring theme across all respondent categories was that audiences may forget presentations, speeches, and product specifications, but they remember experiences that evoke emotions and encourage participation. This observation directly validates the project objective of evaluating how experiential events influence emotional connection and brand recall.

Another significant observation from the internship was the increasing importance of personalization as a tool for strengthening emotional connections. During the McDowell's No.1 relaunch event, photographs of dealers and distributors were captured during the event and subsequently transformed into personalized bobbleheads that were delivered as post-event gifts from the brand. This initiative extended the brand experience beyond the event itself and transformed a standard giveaway into a highly personalized keepsake.

This observation highlights an important evolution within experiential marketing. Modern experiential campaigns are no longer confined to a single event day; instead, they are designed as a sequence of interconnected touchpoints spanning pre-event anticipation, on-ground engagement, and post-event relationship building. The personalized bobblehead initiative demonstrated how post-event engagement can significantly enhance memorability, strengthen dealer relationships, and improve long-term brand recall.

Similarly, dealer engagement initiatives observed during Jaguar-related projects demonstrated that experiential marketing plays a critical role in strengthening channel relationships. Rather than merely sharing business updates, dealer events increasingly focus on recognition, engagement, networking, and experience creation, thereby fostering stronger emotional connections between brands and channel partners.

6.1.6 Future Outlook of Experiential Marketing

Respondents unanimously agreed that experiential marketing will continue to gain strategic importance over the coming years. The future was consistently described as one characterized by personalization, immersive experiences, digital integration, community building, influencer collaborations, and technology-enabled engagement. What makes this finding particularly robust is the convergence of perspectives across all respondent categories. Client-side professionals, agency representatives, experiential brands, and channel partners all shared the belief that consumers increasingly value experiences over messages. As a result, brands are expected to allocate greater resources toward experiential initiatives that foster meaningful interactions and long-term engagement.

The researcher's internship experience strongly supports this conclusion. Across projects involving Jaquar, McDowell's No.1, Smirnoff Minty Jamun, JK Tyre, Red Beryl, and dealer engagement initiatives, a common strategic objective emerged: creating experiences capable of building emotional connections, enhancing brand perception, and generating long-term recall. This suggests that experiential marketing is no longer an emerging trend but a strategic imperative across industries.

6.2 Synthesis: Linking Findings to Project Objectives

The primary research findings, supported by firsthand industry exposure during the internship, collectively confirm the transformation of the event industry from traditional execution-led formats to experiential, emotion-driven engagements.

The study establishes that traditional events are increasingly limited in their ability to create meaningful engagement, whereas experiential events generate stronger emotional connections, higher brand recall, deeper participation, and more sustainable stakeholder relationships. The findings further confirm that storytelling, environment design, personalization, and participation are fundamental building blocks of successful experiential events.

Additionally, the research highlights the growing importance of ATL-BTL-digital integration, influencer collaborations, and post-event engagement strategies in maximizing experiential impact. The Smirnoff Minty Jamun activation ideation process, the immersive touchpoints developed for McDowell's No.1, the experiential concepts for JK Tyre, the dealer engagement initiatives for Jaquar, and the experiential IP development for Red Beryl collectively provide practical evidence supporting these findings.

Taken together, the survey responses and internship observations validate all five sub-objectives of the study and conclusively support the core objective that experiential marketing represents a fundamental shift in how brands engage audiences—from communication-centric approaches focused on information dissemination to experience-centric strategies built around emotion, participation, and long-term relationship building.

ANNEXURE III: QUESTIONNAIRE

Questionnaire A – Brands

SECTION A: DEMOGRAPHICS

1. Name *Poulami Barman*
2. Gender *Female*
3. Age Group *30-35*
4. Organization Name *Jaguar & company Pvt. Ltd.*
5. Current Designation *Brand Manager*
6. Annual Income
7. Industry *Bath Fittings*
8. Years of Experience *8-9 years*
9. Organization Size *12000+ globally*
10. Involvement in Marketing/Event Decisions (1-5) *5*

SECTION B: AWARENESS & PERCEPTION OF HOUSE OF OMNIFIC

1. Are you aware of House of Omnific Pvt. Ltd.?
Yes
2. How did you first learn about House of Omnific?
Brand was engaged already & also word of mouth in the event industry
3. Have you worked with or engaged House of Omnific for any project?
Yes, quite a few
4. How would you rate House of Omnific compared to other agencies?
Comparatively above the other agencies [8.5- does not want number to define]
5. Which strengths do you associate with House of Omnific?
Discipline & Precision it work attention to detail
6. What factors influence your choice of an experiential marketing agency?
Previous works, name in the market & definitely budget
7. How effectively does House of Omnific understand your brand objectives?
Clearly, been working together for a long time

8. What differentiates House of Omnific from other agencies?

Deliverable timelines are shorter & open in discussing changes

9. Would you consider House of Omnific for future projects?

Sure.

more involved?

SECTION C: TRADITIONAL VS EXPERIENTIAL EVENTS

1. Traditional event formats are becoming less effective.

They don't connect any longer with the customers

2. Experiential events create stronger emotional connections.

It ignites something in the hearts of the people.

3. Consumers expect immersive experiences.

Definitely, every customer wants to feel something & be seen.

4. Storytelling enhances event engagement.

Nothing works without storytelling anymore

5. What event elements are most impactful? (Storytelling, Live Demonstrations, Entertainment, Networking, Product Experience, Recognition)

All of it, absolutely important.

6. Experiential events improve long-term brand recall.

Definitely, make customers revisit the brand due to the feeling left

7. Emotional impact influences purchasing behavior.

Does not always convert, but helps in revisiting & of course retaining

8. Experiential events increase your willingness to recommend a brand.

Definitely

SECTION D: ATL, BTL & DIGITAL INTEGRATION

1. Importance of ATL-BTL-Digital Integration.

ATL is the most important, well equipped by BTL

2. Importance of Social Media Amplification.

Very imp, pre & post both
in today's time

3. Most impactful digital elements.

Instagram definitely

4. Hybrid events will become standard.

I do not think so.

SECTION E: FUTURE OUTLOOK

1. Organization likely to increase experiential marketing investments.

Definitely, look at the
campaigns around. That is the focus.

2. Experiential marketing delivers stronger ROI.

Mostly yes, the experience has to
be worthwhile.

3. Most important future applications.

SECTION F: OPEN FEEDBACK

1. What makes an experiential event memorable?

Making the customers feel like a hero.
The most important.

2. Future of experiential ^{event} marketing?

Almost every brand focuses
on experiential marketing. So the
growth is of course there.

Questionnaire B – Competitor Agencies

SECTION A: DEMOGRAPHICS

1. Name *Jyotsana Tiwari*
2. Gender *Female*
3. Age Group *30-35*
4. Organization Name *Showtime Events*
5. Current Designation *Associate Account Director*
6. Annual Income
7. Industry *Event Management*
8. Years of Experience *14 years*
9. Organization Size *200 employees*
10. Involvement in Marketing/Event Decisions (1-5) *5*

SECTION B: INDUSTRY & HOUSE OF OMNIFIC PERCEPTION

1. Are you aware of House of Omnific Pvt. Ltd.? *Yes*
2. How did you first learn about House of Omnific? *Same Industry*
3. How would you position House of Omnific within the industry? *Boutique agency*
4. What are House of Omnific's key strengths?
5. How does House of Omnific differ from you/larger agencies? *lean team*

SECTION C: TRADITIONAL VS EXPERIENTIAL EVENTS

1. Traditional event formats are becoming less effective.
Definitely every brand focuses on experience now. Even dealers meet on conferences focus on this.

2. Experiential events create stronger emotional connections.

Of course it does

3. Consumers expect immersive experiences.

Everybody, even I as a customer.

4. Storytelling enhances event engagement.

Storytelling is the real hero.

5. Importance of storytelling, personalization, sensory engagement, immersive environment, participation and emotional resonance.

Very important, otherwise no impact

6. Experiential events improve long-term brand recall.

The brand leaves a mark in the mind.

7. Emotional impact influences purchasing behavior.

Definitely does

SECTION D: ATL, BTL & DIGITAL INTEGRATION

1. Importance of ATL-BTL-Digital Integration.

Very important

2. Importance of Social Media Amplification.

Very imp especially Post event

3. Most impactful digital elements.

Youtube Instagram

4. Hybrid events will become standard.

Maybe

SECTION E: FUTURE OUTLOOK & INDUSTRY CHALLENGES

1. Biggest challenges facing experiential agencies today.

The originality, the pressure to think differently in the world of social media.

2. Capabilities that will define successful agencies in the future.

The ability to keep up with the generation's changing trends & needs

3. Experiential marketing delivers stronger ROI.

Of course it does.

4. Most important future applications.

SECTION F: OPEN FEEDBACK

1. What makes an experiential event memorable?

The feeling of being 'thought of',
'seen' that the customers feel.

2. Future of experiential marketing?

A lot is happening in the world
of events outside, which
means a lot is waiting for us.
